Interests

Computer engineer with experience in small and small-to-medium scale software projects.

I have experience in different technologies with various languages as a full-stack developer. I just enjoy solving complex problems. I am open to learning new technologies as long as I can bring value to the project and develop my skills in the meantime.

Experienced with NodeJS(Express) and ReactJS. Seeking opportunities to use/improve my skills in full stack development and software architecture.

Education

Sabancı University

Bachelor of Science - BS, Computer Science and Engineering

2016 – 2020

Istanbul, Turkey
